REAL-TIME TRANSACTION DEFENSE

Protect every transaction, stay in control

Detect and block risky transactions instantly, including stolen cards and alternative payment abuse.

- Real-time risk scoring in under 150 milliseconds, continuously updated across the user lifecycle
- Patented AI/ML model ensemble, continuously retrained through online learning as fraud patterns shift
- Fraud Attack Defense agents provide real-time monitoring, alerting, and response to fraud attacks
- AI Review Agents proactively analyze hundreds of signals and return explainable decisions and insights
- Built-in protection against BNPL, wallet, crypto, gift card, and alternative payment method abuse
- Flexible risk scoring for teams building and deploying their own custom models

LESS MANUAL REVIEW, MORE CONFIDENCE

Automate routine decisions, investigate in real time

Cut manual review volume by automating routine decisions and providing analysts with deep context.

- Automated policies that cut manual review volume without adding risk
- Backtest proposed changes against historical traffic
- Bulk decisioning and historical network visualization for faster, higher-context investigations
- No-code tools for rule creation and modification
- Built-in dispute data ingestion and stronger user identification
